Skills

Programming Languages

- Python
- Java
- Rstudio
- C++

Databases and Servers

- Google Cloud Platform
- Amazon RedShift
- Microsoft Azure
- MongoDB

Data Science Tools

- Tableau
- SageMaker
- Jupyter Lab
- MATLAB

General Skills

Data Science, Web Analytics, Machine Learning, Statistical Analysis, Artifical Intelligence, Deep Learning, Data Visualization, Algorithms, Natural Language Processing, CNN, Agile Methodologies, Big Data, Supervised Learning, Business Intelligence, Data Structuring, SQL

Libraries and Technologies

Pandas, NumPy, TensorFlow, Sklearn, Prophet, Matplotlib, Stata, Keras, Kubernetes, GGplot, OpenCV, PyTorch, Bokeh, SciPy, Ruby, Sklearn, Luminoth, TabPy, SQLAlchemy, Docker, Fire

Certificates

- Applied Data Science
- Mathematics for Machine Learning
- Python3 Specialization
- Biostatistics in Public Health

Summary

- Data scientist and statistical analyst and with 3 years of demonstrated experience in predictive analytics. Skilled with using AWS RedShift and Google BigQuery databases for projects using SageMaker and Tableau.
- Extensive background in Python and R machine learning libraries for supervised learning models. Knowledgeable in utilizing statistical methods for quantifying metrics. Skilled with producing visualizations and insights from large datasets.
- Strong analytical and presentation skills gained from producing quantitative data analysis, generating business intelligence reports, and structuring large sets of data.
- Knowledgeable in constructing all aspects of analysis workflows with Jupyter, Tableau, Google Data Studio, SageMaker, Microsoft PowerBI and Excel.
- Skilled in Python development and statistical libraries including pandas, numpy, fbprophet, sklearn, scipy, and MatPlotLib to produce end-to-end machine learning models from idea to implementation. Well versed in R and Rshiny to produce parallel statistical analysis.

Work Experience

MYS Group — Austin, TX

Data Scientist — March 2020 - Present

Collaborated with a team of data scientists and analysts to work on time-series forecasting models and reports to help clients scale business metrics.

Utilized statistical and ML libraries including Stata, sklearn, fbProphet, pandas, NumPy, Matplotlib.

- Statistical modeling methods
- Supervised learning networks
- Predictive sales forecasting
- Deep learning for ad campaigns
- ML server integration with TabPy

Data Analyst — April 2019 - March 2020

- Web performance analytics
- Automated database extraction
- Demographic pattern insights
- Search engine optimization
- Dashboard KPI automation

Morelia — Austin, TX

UX + Product — March 2018 - March 2019

- Designed accessible web experience using React Native for interactions
- Integrated FB Pixel and Google metatagging APIs for demographic esearch
- A/B tested multiple digital campaign sets to optimize audience reach
- Prototyped interaction flows for online experiences
- Incentivized user feedback for in-store research
- Captured sales analytics from POS data

Simply Math — Austin, TX

Java Mobile Developer — June 2016 - August 2017

Developed Android application aimed to teach various math exercises to students. Implemented efficient data structures and modern systems design to optimize user experiences.

- Implemented dynamic scalability API's to focus on accessibility across users
- Analyzed customer metrics to push critical updates on time
- Utilized git version control to manage project commits and requests

Education

Texas A&M University — College Station, TX

Bachelor of Science, Political Science — August 2021

Dartmouth College — Hanover, NH

Post-Graduate, Applied Data Science — July 2021

Penn State University — State College, PA

BS, Computer Science (Transfer) — August -Dec 2017
